NEW

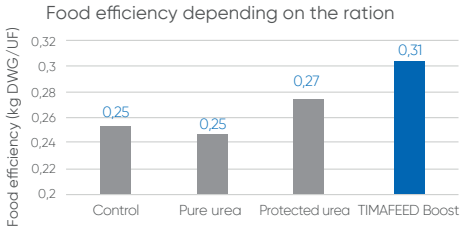

TIMAFEED BOOST

1 Synchronized nitrogen release

Source : CMI

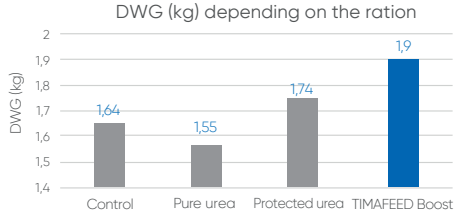

2 Valorization of the ration

+20% of food efficiency

Source : Lab To Field

3 Improved performance

+16% of DWG

Source : Lab To Field

RECOMMENDATIONS:

Recommended doses of TIMAFEED Boost if used as the unique source of feed urea
Heifer, fattening cattle: 45 g/100 kg of live weight/day
Suckler cows: 300 g/head/day
Fattening sheeps & goats: 40 g/100kg of live weight/day

Usage instructions:

- Bacterial flora requires time to adapt.
- 1st week: half dose of TIMAFEED Boost
- 2nd week: ¾ dose of TIMAFEED Boost
- 3rd week: full dose of TIMAFEED Boost

NITROGEN RUMINAL ACTIVATOR

NITROGEN RUMINAL ACTIVATOR

TIMAFEED

PATENT n°WO 2019/115978

BOOST

Progressive release

Better availability of N over time

Better value for rations

Maintaining pH

+ 0.73 point

*of ruminal pH **

Fermentation efficiency

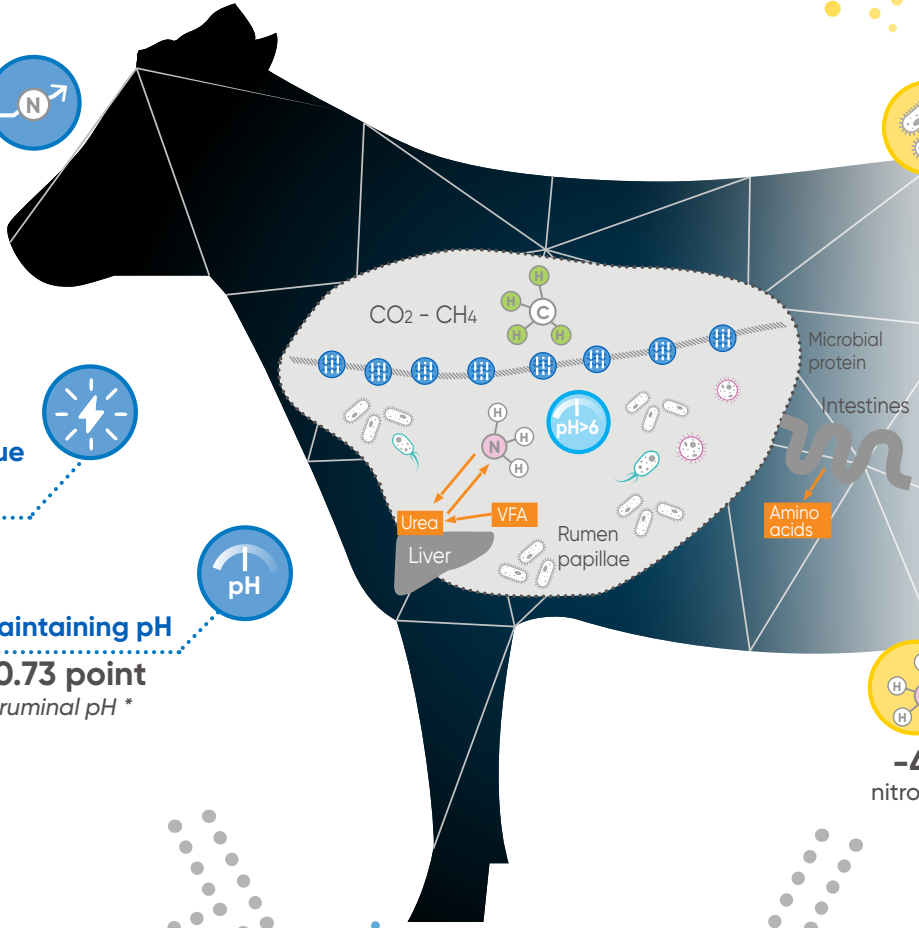

+7% propionic acid

Digestive efficiency

+10 points food efficiency

Nitrogen efficiency

-44% ammoniacal nitrogen in the rumen, limits the risk to the liver

TIMAFEED BOOST

**Follow-up in artificial rumen by CMI Roullier*
